Work with your healthcare team to identify which foods might be causing symptoms. Plan a time to start the diet when you know you can be successful. Prepare yourself by having the foods you will need on hand and prep as much as possible in advance. Step 2. Eliminate. Remove dairy and wheat products from the diet for 4 weeks without any exceptions. It is important to read food labels and use caution when dining out, since you have less control over the ingredients in restaurants.

### Comprehensive Elimination Diet

A food elimination diet is a systematic approach used to identify food sensitivities. Food elimination diets can take on a number of different forms. In this plan, we excluded foods that contain the 8 most common allergens, but if you strongly suspect that, for example, dairy is the culprit and choose to only replace dairy items with nondairy alternatives, you can modify this plan as needed.
