Aviation English investigates the key issues related to the use of English for the purpose of communication in aviation and analyses the current research on language training, testing and assessment in the area of Aviation English. Based on a series of recent empirical studies in aviation communication and taking an interdisciplinary approach, this book: provides a description of Aviation English from a linguistic perspective lays the foundation for increased focus in the area of Aviation English and its assessment in the form of English Language Proficiency (ELP) tests critically assesses recent empirical research in the domain. This book makes an important contribution to the development of the field of Aviation English and will be of interest to researchers in the areas of applied linguistics, TESOL and English for Specific Purposes.

Taking readers step-by-step through the major issues surrounding the use of English in the global aviation industry, this book provides a clear introduction to turning research into practice in the field of English for Specific Purposes (ESP), specifically Aviation English, and a valuable case study of applied linguistics in action. With both cutting-edge research and evidence-based practice, the critical role of English in aviation is explored across a variety of contexts, including the national and global policies impacting training and language assessment for pilots, air-traffic controllers, ground staff, and students. English in Global Aviation teaches readers how to apply linguistic research to real world, practical settings. The book uses a range of corpus-based findings and related research to provide an effective analysis of the language needs of the aviation industry and an extended look at linguistic principles in action. Readers are presented with case studies, transcriptions, radiotelephony, and a clear breakdown of the common vocabulary and phrasal patterns of aviation discourse. Students and teachers of both linguistics and aviation will discover the requirements and challenges of successful intercultural communication in this industry, as well as insights into how to teach, develop, and assess aviation English language courses.

This volume offers research-based studies on English for Specific Purposes in higher education from across the world. By drawing on international studies, the book brings together diverse ESP practices and aspects of relevant issues in the development of ESP programs, teachers and learners in a coherent fashion. There is a growing need for undergraduate students to develop their proficiency of ESP skills and knowledge in the increasingly globalized world. Knowledge of ESP is an important factor in subject matter learning by students, and also closely related to the performance of university graduates in the relevant sectors. Careful planning and efficient implementation are essential to ensure the quality of the language

learning process. For a variety of reasons, it proves difficult to maintain ESP instruction in higher education. These reasons include the incompetence of teachers, lack of materials for that specific context, as well as lack of opportunities for ESP teachers to develop their skills. The chapters in this book, taken from a wide variety of countries, shed light on the diversity of current practices and issues surrounding ESP.

Introducing English for Specific Purposes presents the key concepts and practices of ESP in a modern, balanced, and comprehensive way. This book defines ESP and shows how the approach plays a crucial role in the world of English language teaching. Explaining how needs analysis, language and learning objectives, materials and methods, and evaluation combine to form the four main pillars of ESP, the book includes: practical examples that illustrate how the core theories and practices of ESP can be applied in real-world academic and occupational settings; discussion of some of the most hotly debated issues in ESP; insights on how ESP courses can be organized and integrated to form a complete program; reflection boxes, practical tasks, extension research questions, and resources for further reading in each chapter. Introducing English for Specific Purposes serves as an ideal textbook for graduate and advanced undergraduate students studying courses on English for Specific Purposes or English for Academic Purposes, as part of degrees in English for Specific Purposes, Education, ELT, Applied Linguistics, TESOL or TEFL. This comprehensive publication is also an invaluable reference resource for pre-service and in-service teachers of ESP, and for English program managers and administrators.

This volume provides an important contribution to the study of vocabulary and its relationship to English for Specific Purposes (ESP) research and teaching. Focussing on quantitative and qualitative approaches, this book draws on a wide range of literature to explore key issues that include: how to identify and categorise specialised vocabulary; and the role and value of word list research in English for Academic Purposes (EAP) and ESP. This book features: An analysis of material in a range of different contexts that include secondary school education, pre-university and university-based education, professional and occupational ESP, and the trades. inclusion of many examples of specialised vocabulary from research in Aotearoa/New Zealand and from many other areas in the world. a review of the application of vocabulary research to professional and pedagogical practice suggestions for future directions for research. Written by a leading researcher, Vocabulary and English for Specific Purposes Research provides key reading for those working in this area.

English for Vocational Purposes provides a linguistic description of English in the context of the trades and investigates how this specialist language is used in real-world contexts. As the demand for English-speaking workers in the trades grows internationally, a major gap in the research on language in the trades is evident. Based on courses in construction and engineering at a polytechnic in New Zealand, this book offers an empirical response to this gap in research. Features of this book include: new research on linguistic features of written and spoken texts in trades education, with a special focus on discourse, visual elements of written texts and vocabulary; real-life examples of the language in context, along with implications for teaching and learning and a chapter devoted to putting research findings into practice; qualitative and quantitative data to support examples and shed light on the most complex aspects of English as a trades language; supplementary material online which includes technical word lists in areas of carpentry, plumbing, automotive technology and fabrication (welding). Paving the way for a new research agenda in the field of ESP, English for Vocational
