The Beck Depression Inventory (BDI, BDI-II), created by Dr. Aaron T. Beck, is a 21-question multiple-choice self-report inventory, one of the most widely used instruments for measuring the severity of depression. Its development marked a shift among health care professionals, who had until then viewed depression from a psychodynamic perspective, instead of it being rooted in the patient's own thoughts.

Beck Depression Inventory (BDI) - Addiction Research ...

The Beck Depression Inventory (BDI) is a 21-item self-reporting questionnaire for evaluating the severity of depression in normal and psychiatric populations [1, 2]. Developed by Beck et al. in 1961, it relied on the theory of negative cognitive distortions as central to depression [3].

Assessing the Reliability of Beck Depression Inventory ...

Beck Depression Inventory (BDI) is one of the most popular measures of depressive symptoms worldwide.4 First proposed by Beck et al.,5 this instrument has been used in more than 7,000 studies so far. The theoretical assumption of the original BDI relied upon the belief that negativistic distorted cognitions would be the core characteristic of depression.6

Psychometric properties of the Beck Depression Inventory ...

Beck's Depression Inventory . This depression inventory can be self-scored. The scoring scale is at the end of the questionnaire. 1. 0 I do not feel sad. 1 I feel sad 2 I am sad all the time and I can't snap out of it. 3 I am so sad and unhappy that I can't stand it. 2. 0 I am not particularly discouraged about the future.

Beck's Depression Inventory

Twenty-one years have passed since the Beck Depression Inventory (BDI) was first described by Beck et al. [16]. Over the years, two important reviews about the psychometric properties of the BDI have been written by Beck and Beamesderfer [15] and Mayer [123]. The former review stressed aspects of reliability and validity, whereas the latter review also compared the BDI with other self-report measures of depression.

Applications of the Beck Depression Inventory | SpringerLink

Aaron Temkin Beck is an American psychiatrist who is professor emeritus in the department of psychiatry at the University of Pennsylvania. He is regarded as the father of both cognitive therapy and cognitive behavioral therapy. His pioneering theories are widely used in the treatment of clinical depression and various anxiety disorders. Beck also developed self-report measures of depression and anxiety, notably the Beck Depression Inventory which became one of the most widely used instruments fo
