He can be reached at [liptakbela@aol.com](mailto:liptakbela@aol.com). In process control, there are at least five levels of sophistication that the automation engineer can apply. The advantage of the higher levels is better control, but applying a higher level also requires better understanding of the process. In the analog age, using higher levels of sophistication also involved substantially higher costs, but in the digital age, this consideration has become less significant.

Béla Lipták defines 5 levels of process control

By working through the background information and with the help of Shinskey's "Process Control Systems," I was able to use Liptak's handbook to develop what should be a robust control system. This handbook includes sections on PLCs, DCS - and integration with other systems, programming, valve hardware, fieldbus, sizing control valves, etc.
