This case study book is designed to provide students with the opportunity to work through various audit procedures that are performed during the planning and interim phases of a financial statement audit. Typical client scenarios that are regularly observed in the profession are the basis for this case study, and the aim is to expose students to the tasks they would typically perform in their first year of auditing practice.

Cloud 9 is designed to provide students with the opportunity to work through various audit procedures that are performed during the planning and interim phases of a statutory audit. The case study is based on typical client scenarios that are regularly observed in the profession. The aim of this case study is to expose students to the practice of auditing and the tasks they would typically perform in their first year of auditing practice. Cloud 9 is derived from an audit case learning resource used as part of the Ernst & Young graduate development program. Cloud 9 will provide your students - with a practical context of auditing and an appreciation of the level of quality, activity and knowledge Ernst & Young apply to the audit process and the vital role of auditing in practice and business.

The explosion of data analytics in the auditing profession demands a different kind of auditor. Auditing: A Practical Approach with Data Analytics prepares students for the rapidly changing demands

of the auditing profession by meeting the data-driven requirements of today's workforce. Because no two audits are alike, this course uses a practical, case-based approach to help students develop professional judgement, think critically about the auditing process, and develop the decision-making skills necessary to perform a real-world audit. To further prepare students for the profession, this course integrates seamless exam review for successful completion of the CPA Exam.
