Crocodiles (subfamily Crocodylinae) or true crocodiles are large semiaquatic reptiles that live throughout the tropics in Africa, Asia, the Americas and Australia. Crocodylinae, all of whose members are considered true crocodiles, is classified as a biological subfamily.A broader sense of the term crocodile, Crocodylidae (which includes Tomistoma), is not used in this article.

Crocodile - Wikipedia

Crocodiles are the largest and the heaviest of present-day reptiles. The largest representatives, the Nile crocodile (*Crocodylus niloticus*) of Africa and the estuarine (or saltwater) crocodile (*C. porosus*) of Australia, attain lengths of up to 6 metres (20 feet) and weigh over 1,000 kg (about 2,200 pounds).

crocodile | Habitat, Description, Teeth, & Facts | Britannica

Crocodiles and alligators belong to a group of reptiles called crocodylians, which are the largest of the living reptiles. Of the 23 different species of crocodylians in the world, 2 species are native to the United States, and south Florida is the only place where both of these species coexist.

American Crocodile | National Geographic

Crocodile - Crocodile - Natural history: The young crocodile emerges from the egg with a length of 20–30 cm (8–12 inches). At first it remains with its siblings concealed at the edge of its water habitat in order to avoid various predators. Principal among these are fishes and birds, but larger crocodiles also prey upon the young.

Crocodile - Natural history | Britannica

The Crocodile is a large aquatic reptile that lives throughout the Tropics in Africa, Asia, the Americas and Australia. Crocodiles tend to congregate in freshwater habitats like rivers, lakes, wetlands and sometimes in brackish water (water that is saltier than fresh water, but not as salty as seawater). Some species, particularly the Saltwater Crocodile of [...]
