AP7301 ELECTROMAGNETIC INTERFERENCE AND COMPATIBILITY

Electromagnetic Compatibility, also known as EMC, is the interaction of electrical and electronic equipment with its electromagnetic environment, and with other equipment. All electronic devices have the potential to emit electromagnetic fields. With the proliferation of electronic devices into everyday life - TVs, washing machines, electronic ignitions, traffic lights, mobile phones, ATMs, anti-theft tags, to name but a few - there is therefore a huge potential for devices to interfere with ...

What is Electromagnetic Compatibility (EMC) and Why ...

Electromagnetic Compatibility. When there were crackles and pops on the wireless, or the TV turned to snow, people used to talk of 'Radio Frequency Interference' or RFI. Nowadays the problem of electrical and electronic systems interfering with one another can occur in many applications, and is referred to as Electromagnetic Compatibility – EMC. Electronic machines are everywhere now, and operate at high frequencies (which are harder to contain) and high powers, so in some ways it's ...
