As nonprofit organizations face heightened scrutiny by the general public, donors, regulators, and members of Congress, the Third Edition of the essential book on the basics of fundraising provides new, up-to-date and valuable information that every fundraiser needs to know. With ethics and accountability being the primary theme of the Third Edition, this practical guide will continue to provide an overview of the field and give development staff, managers, and directors a platform from which to operate their fundraising programs. The new edition also provides much needed information on giving trends, computer hardware and software available for fundraisers, cost estimates and workflow timetables, and the importance of the Internet. This primer remains a must-have for anyone new to the fundraising arena.

"From adjusted gross income to zoning and property taxes, the second edition of The Encyclopedia of Taxation and Tax Policy offers the best and most complete guide to taxes and tax-related issues. More than 150 tax practitioners and administrators, policymakers, and academics have contributed. The result is a unique and authoritative reference that examines virtually all tax instruments used by governments (individual income, corporate income, sales and value-added, property, estate and gift, franchise, poll, and many variants of these taxes), as well as characteristics of a good tax system, budgetary issues, and many current federal, state, local, and international tax policy issues. The new edition has been completely revised, with 40 new topics and 200 articles reflecting six years of legislative changes. Each essay provides the generalist with a quick and reliable introduction to many topics but also gives tax specialists the benefit of other experts' best thinking, in a manner that makes the complex understandable. Reference lists point the reader to additional sources of information for each topic. The first edition of The Encyclopedia of Taxation and Tax Policy was selected as an Outstanding Academic Book of the Year (1999) by Choice magazine."--Publisher's website.

Soon after the beginning of the 'Great War', Sir Robert Baden-Powell published his 9th military title, Quick Training For War, as his personal contribution to the British war effort. Having previously retired from service in 1910 to promote the Scouting movement, this short manual promoted his ideas for preparing new recruits to be smart and efficient soldiers. In contrast to the long established British army training regime of pomp, stark discipline and 'marching round the square' drill; he urges instead a focus on the "Four Cs": Courage, Common Sense, Cunning, Cheerfulness as a way of more realistically training recruits to better meet the rigors and reality of modern combat. Drawing heavily on his own combat experiences in India and Africa, he outlines a clear and simple course of study to help the new soldier develop his field skills and spirit. His noting of the superior Boer use of earthworks/trench fortifications certainly seem to have been proved topical and forward-thinking considering how trench warfare became the defining characteristic of the World War One battlefield. Each chapter includes many personal anecdotes to illustrate his theories on best training practices. This booklet is well written and interesting for any student of military history, particularly those with an interest in how war-fighting practices and mindset changed radically from the early 1900's and forward. It features 18 illustrations by Baden-Powell as well. It makes a great companion read to his 1899 book on reconnaissance training, Aids to Scouting. (also available at Google Play)

Local nonprofit organizations are often small, loosely structured, and democratically governed, and therefore do not fit conveniently into traditional theories of organizational behavior that are rooted in administrative science and bureaucratic structure. Treating community organizations as parts of larger systems--organizational fields or ecologies and communities--this collection of papers presents various perspectives on local nonprofit organizations from the standpoint of organizational theory. The essays draw on an array of methods and theoretical approaches taken from population ecology theories of organizations, laying the foundation for the structural analysis of community organizations.
