Homeostasis All of the organs and organ systems of the human body work together like a well-oiled machine. This is because they are closely regulated by the nervous and endocrine systems. The nervous system controls virtually all body activities, and the endocrine system secretes hormones that regulate these activities.

Homeostasis (Read) | Biology | CK-12 Foundation

This PPT provides an outline for organization of the human body, structure and function of 11 body systems, homeostasis, negative and positive feedback loops, and set points. It is intended to introduce main ideas, between more in-depth activities.
