of the snail. The risks from these hazards are that: food-poisoning bacteria can be transferred to other snails during preparation; food-poisoning bacteria from e.g. worker's hands, tools, working

Guidance on producing Snails for human consumption

Snail eggs are eaten raw, and Merlino says they match well with tartares of fish, prawn or beef, because they're delicate and mineral. While still a niche product used mostly for high-end food service, the interest in snail caviar follows the recent burgeoning of Italy's heliciculture (snail farming) industry.
