from the monasteries and universities of thirteenth-century Europe to Silicon Valley in the twenty-first, Dennis Duncan reveals how the index has saved heretics from the stake, kept politicians from high office and made us all into the readers we are today. We follow it through German print shops and Enlightenment coffee houses, novelists' living rooms and university laboratories, encountering emperors and popes, philosophers and prime ministers, poets, librarians and - of course - indexers along the way. Revealing its vast role in our evolving literary and intellectual culture, Duncan shows that, for all our anxieties about the Age of Search, we are all index-rakers at heart, and we have been for eight hundred years. *A Financial Times and History Today Book of the Year*

The book presents chapters on: - the state of the art in data warehouse research - data storage and index structures - finding optimal tree-based index structures - aggregated data in tree-based index structures - performance models for tree-based index structures - and techniques for comparing index structures.
