CONSTRUCTION ACCOUNTING & FINANCIAL MANAGEMENT, 3/e helps construction professionals and construction management students master the principles of financial management, and adapt and apply them to the challenge of profitably managing construction companies. It integrates content that has traditionally been taught through separate accounting, finance, and engineering economics texts. Students learn how to account for a construction company's financial resources; how to manage its costs, profits, and cash flows; how to evaluate different sources of funding a company's cash needs; and how to quantitatively analyze financial decisions. Readers gain hands-on experience through 220 example problems and over 390 practice problems, many of them based on situations actually encountered by the author. This edition adds more than 100 new discussion questions, and presents financial equations and accounting transactions more visually to support more intuitive learning.

The Student Practice and Solutions Manual to accompany Kieso Intermediate Accounting 17e contains a chapter review, and a selection of brief exercises, exercises, and problems with accompanying solutions from Kieso's Problem Set B which is similar to end of chapter material.

Solutions manual for sale to students provides full solutions for odd-numbered end-of-chapter assignment items, including questions, exercises, problems, and cases. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The text's efficient format does not overwhelm students, and its accessible style provides an alternative to more encyclopedic, reference-book approaches. The book offers a blend of the core concepts of accounting principles with procedural applications. This approach is supplemented with the

most expansive set of end-of-chapter material on the market, a thorough integration of today's hot topics, and a robust selection of student and instructor print and online resources.
