This book surveys the main issues in Company Law relating to contracts made by or with companies.

This book surveys the main issues in Company Law relating to contracts made by or with companies.

A. J. Boyle assesses the state of English company law on minority shareholders' remedies from historical, theoretical and comparative perspectives in this important addition to Cambridge Studies in Corporate Law. He analyses the reforms of the UK Law Commission, which have been further appraised and amplified by the work in progress of the Company Law Review Steering Group. The book covers the common law actions by exception to the Rule in Foss v. Harbottle, and the statutory remedies by way of petition for unfair prejudice and/or just and equitable winding up. As well as considering the complexities of derivative actions and statutory minority remedies, Boyle discusses directions for minority shareholders' remedies. This book will be of interest to academics and practitioners in company and corporate law, particularly in the UK, US, France and Germany, as well as throughout the Commonwealth.

First published in 1998, Routledge is an imprint of Taylor & Francis, an informa company.

This in-depth comparative examination of the derivative action in Asia provides a framework for analysing its function, history and practical application and examines in detail how derivative actions law works in practice in seven important Asian jurisdictions (China, Hong Kong, India, Japan, Korea, Taiwan and Singapore). These case studies allow an evaluation of a number of the leading Western comparative corporate law and governance theories which have come to define the field over the last decade. By debunking some of these critically important theories, this book lays the foundation for an accurate understanding of the derivative action in Asia and a re-examination of the regulation of the derivative action around the world.

This book surveys the main issues in Company Law relating to contracts made by or with companies.
