More than 495,000 definitions of a wide variety of acronyms, initialisms, abbreviations and similar contractions enable you to quickly and easily translate terms into their full names or meanings. New terms from subject areas such as associations, education and the Internet are now included.

This study provides a close reading and a critical analysis of four novels by contemporary Canadian women writing in English: Joy Kogawa's *Obasan* (1983), Sky Lee's *Disappearing Moon Cafe* (1990), Kristjana Gunnars's *The Prowler* (1989), and Aritha van Herk's *No Fixed Address* (1987). The analysis draws on a combination of post-structuralist, post-colonial and feminist working concepts and perspectives. It is predicated on the assumption of the fundamental interconnectedness of all aspects of human knowledge, and partakes of the process of intertextuality affecting our own contemporary experience of the world. Recent fiction by women, but also feminist and postcolonial theories of meaning and textuality, have had an important share in changing our views of the world/text from a closed structure to a constant process of cultural/textual interaction between two or more cultures/texts. The novels examined here provide rich sites for the exploration of these changing paradigms and their exegesis will offer alternative ways of dealing with language, history, gender, fiction, text and reality in Canada and elsewhere.

Powerful new techniques, including heavy ion and exotic beams, are pushing the frontiers of nuclear physics and opening up a wealth of new fields of research. After introductory chapters on theoretical and experimental aspects of nuclear collisions and beams, ``Exotic Nuclear Physics'' offers articles by experienced lecturers on forefront topics in nuclear physics, such as the conquest of the neutron and the proton drip-lines, nuclear astrophysics, the equation of state of hypernuclear matter, nuclear supersymmetry and chaotic motion in nuclei. This volume continues the successful tradition of published lecture notes from the Hispalensis International Summer School. It will benefit graduate students and lecturers in search of advanced material for self-study and courses as well as researchers in search of a modern and comprehensive source of reference.
