This is one of the few books on the market dealing with offshoring of professional services, a dynamic phenomenon of high relevance in the global economy. The market for offshore services is worth more than 1 trillion dollars annually and employs millions of people. Global offshoring of services has been recently undergoing a profound transformation due to automation and robotisation of tasks. It can be associated with the increased codification of knowledge, commoditisation of services and advancement in technology. The global perspective has been supplemented by a detailed analysis of offshoring in Central and Eastern Europe. It witnesses a dynamic growth of foreign direct investment (FDI) in professional services, resulting in capital and knowledge transfers. This books is a result of a holistic approach and an interdisciplinary research. It is enriched with conclusions from meetings with representatives of: authorities responsible for attracting FDI; associations of offshoring firms; and enterprises operating in professional services. It was also a result of numerous discussions with scholars during academic conferences and research seminars.

This book discusses organizational values and their implications for perceived attractiveness and effectiveness of the workplace through cross-cultural research in India and Sweden. The authors provide information on how organizational values are conceptualized, presented and perceived by manager-level employees through cases from manufacturing, information technology (IT), healthcare, and education sectors in a developing and fast-growing economy like India versus a developed and stabilized economy like Sweden. Comparative results from these two very different countries provide knowledge that can be applied to make the workplace attractive in the context of globalized business processes. The authors present corporate social responsibility (CSR) and equal opportunities for men and women in the organization (EO) as important values in making the workplace attractive, where attractiveness is conceived in terms of organizational commitment and employees' intention to leave. The two selected values are particularly important as India is the first country in the world to come up with a mandatory CSR law, whereas Sweden has a long history of CSR and EO. The book demonstrates how work organizations in both countries are promoting these values to meet the challenges of attraction and retention of employees. The findings in this book are based on data gathered from various sources and sample groups in India and Sweden. The book generates insight and valuable information for researchers of organizational psychology, human resource management, cross-cultural management, as well as for work managers and HR professionals.

The Intangible Economy: How Services Shape Global Production and Consumption studies aspects of the role of services in development as well as on particular sectoral issues, always with policy considerations lurking not far from the analysis. The volume highlights the evolution and significance of services in the global economy, including as a vehicle for development. It discusses the major pillars that hold the services infrastructure together, namely, its governance and financing mechanisms. Other chapters adopt more specific geographical or sectoral perspectives, including a regional study of the impact of services in economic integration in ASEAN; a country-level analysis of the role of services in economic and social upgrading in India; a look at industry-specific dynamics through the business process outsourcing model; and finally, a value chain view to understand how services are impacted on a granular or micro level by policies.
