States Recommending Cremation Only. After initially stating that individuals who die of COVID-19 can only be cremated, the state of Nevada clarified and said "Decedents with COVID-19 can be buried or cremated." Currently, NFDA is not aware of any state laws requiring cremation for the remains of a decedent who died of a communicable disease.

Cremation & Burial - NFDA

Now, the latest "NFDA Cremation & Burial Report" predicts that the cremation rate in the United States will hit 52.9% in 2018 (once the final data become official) and will soar to 78.4% in 2040. By that year, NFDA projects that the number of casketed burials will account for just 16% of U.S. deaths. Learn more in the July 2 issue of the Memorial Business Journal (member login required.)

Reproduction of the original: History of Embalming by J.N Gannal

In response to the coronavirus disease 2019 (COVID-19) pandemic and the societal disruption it has brought, national governments and the international community have invested billions of dollars and immense amounts of human resources to develop a safe and effective vaccine in an unprecedented time frame. Vaccination against this novel coronavirus, severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), offers the possibility of significantly reducing severe morbidity and mortality and transmission when deployed alongside other public health strategies and improved therapies. Health equity is intertwined with the impact of COVID-19 and there are certain populations that are at increased risk of severe illness or death from COVID-19. In the United States and worldwide, the pandemic is having a disproportionate impact on people who are already disadvantaged by virtue of their race and ethnicity, age, health status, residence, occupation, socioeconomic condition, or other contributing factors. Framework for Equitable Allocation of COVID-19 Vaccine offers an overarching framework for vaccine allocation to assist policy makers in the domestic and global health communities. Built on widely accepted foundational principles and recognizing the distinctive characteristics of COVID-19, this report's recommendations address the commitments needed to implement equitable allocation policies for COVID-19 vaccine.

Congratulations to Mr Rosen for writing a fascinating and most interesting history of cremation in the USA. He raises many issues that are relevant today and the need to regulate and monitor the industry. The Cremation Society of Great Britain, founded by Sir Henry Thompson and his colleagues, paved the way forward in the UK for cremation practises. I recommend strongly that United States legislatures do take notice and act upon the recommendations made in this book. I thoroughly enjoyed reading this book.-The Earl Grey, President, The Cremation Society of Great BritainVery interesting. I learned things I didn't know about the conflict some Catholics have with cremation and gained a better understanding of the religious objections which arise in Judaism. I also enjoyed learning about the personalities of some of the early advocates of cremation.... Very readable and entertaining. Until people are able to think and talk about end-of-life issues, they will never be able to plan ahead and help their families make appropriate arrangements.-Carolyn Hayek, Former Executive Director of People's Memorial AssociationLike Service's famous epic poem, Rosen's popular history is bound to excite new interest in the practice of cremation. Everything you ever wanted to know about the subject of cremation and more.-Dr. Martin Greenberg, Professor of Criminal Justice, Point Park College, Pittsburgh, PAIn this captivating review of the history, the practice, and the industry of cremation in America, award-winning former New York Times columnist Fred Rosen provides an authoritative source of information and many revealing facts about an increasingly common, yet still controversial, alternative to burial.Rosen gives an entertaining first person account of his inquiry into the practice of cremation and its roots. He describes the early ancient custom of cremation by funeral pyre and then explores why the rising Church banned the practice as a sacrilege. He then traces the underpinnings of the modern cremation movement in the late 19th century among a colorful group of intellectuals and physicians. This 19th century group endorsed this then illegal practice as a means to improve public health-as a way to prevent seepage of burial grounds from polluting ground water and spreading disease.Rosen goes on to examine, in today's world, people's feelings about death and religion as well as their sensitivities to cremation. Given certain abuses, he believes that this industry needs to be regulated. However, he finds much in favor of cremation when firsthand comparing its costs vs. the excesses and extravagances of the burial funeral industry.In an age when over 25 percent of the population is turning to cremation as a preferred funeral arrangement, this book offers much timely, useful, and engrossing information.

This book is a compilation of funeral messages by the Arrington Funeral Directors of Jackson, Tennessee. We are especially thankful to the local church pastors/ministers in our area who took the time to help write this book. Several writers have chosen to mention the name of the deceased and their family as an ongoing tribute to their life and legacy, while others wrote in more general terms. We want to thank each of you for your time and commitment to this project! We hope this book serves as a ministry tool helping pastors of every age and stage of ministry to better serve grieving families. We especially hope it will help younger pastors to have a needed resource in a moment of crisis.
