Trial Practice: Exercises in Witness Examination and the Rules of Evidence is a remarkable new text designed for Trial Advocacy courses. With special attention paid to the Rules of Evidence, these classroom simulations aim to cultivate students' skills at witness examination. Concisely written, the author has carefully stripped out non-essential material from the traditional approach to the course, directing attention instead at core trial skills. The text, written in workbook format, contains 35 simulations that allow students and professors to see marked improvement in trial skills throughout the course, and the hands-on format thoroughly engages students in the subject matter while teaching them practical skills required in legal practice. The comprehensive Teacher's Manual provides everything necessary to make the class teachable, requiring minimal preparation time from the instructor.

Trial Practice: Exercises in Witness Examination and the Rules of Evidence is a remarkable set of exercises designed for Trial Advocacy courses. This new edition adds coverage of electronic evidence and confrontation clause issues. With special attention paid to the Rules of Evidence, these classroom simulations aim to cultivate students' skills at witness examination and arguing evidence objections and motions. The text, written in workbook format, contains 35 civil and criminal trial simulations that allow students and professors to see marked improvement in trial skills throughout the course. The hands-on format thoroughly engages students in the subject matter while teaching them practical skills required in legal practice. Problems in Trial Advocacy, 2021 Edition, is the premier volume for realistic and accessible courtroom simulations. Many of the problems are based on real trials, both civil and criminal. A series of vignettes lead the reader through opening statements, direct and cross-examination of lay and expert witnesses, exhibit introduction, witness impeachment, and closing arguments. These hands-on exercises include variety of electronic exhibits, providing practice for the changing courtroom experience. Problems in Trial Advocacy lets students practice their courtroom skills without memorizing a full case file of facts. The advocacy standard, updated with modern challenges to advocacy skills.

Unlike other trial advocacy books that teach what to say and do in the courtroom, this reference teaches how to say and do it. Based on 25 years of experience from coaching practitioners, this handbook reveals techniques—incorporating cutting-edge discoveries in linguistics, neuroscience, and sports psychology—to help litigators look, sound, and feel natural and polished in the courtroom. Questions that lawyers face daily, such as What do I do with my hands? Aren't gestures distracting? How do I remember everything? and I tend to talk so fast—how can I slow down? are among the questions addressed in this handbook.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary

action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Defendant Reginald McKay, a mentally disturbed American who became a "home-grown" Islamic terrorist, poisoned members of a Jewish temple during Passover seder. After one of the poisoned congregants died, the Feds got a lucky break thanks to an eyewitness and modern computer forensics and quickly built a death penalty case against McKay. Newton's case file, *United States v. McKay*, is built around the tragic story of McKay and his victims and includes twenty advocacy exercises from all major stages of a criminal case. Each of these twenty exercises will introduce a wrinkle-involving a constitutional challenge to procedures or evidence-that students then analyze through the lens of the Supreme Court's decisions in landmark criminal procedure cases such as *Batson v. Kentucky*, *Jackson v. Virginia*, and *United States v. Cronin*, among others. Taken as a whole, these exercises track the maneuverings of a complex criminal defense and prosecution, starting with pretrial motions; continuing through jury selection, trial, and sentencing; and concluding with postconviction motions. An instructor using *Trial Advocacy in Action* may, as desired, direct students either to prepare short written pleadings or to practice oral advocacy in support of their legal arguments. This fusion of factually compelling scenarios and intellectually challenging legal doctrines creates a robust learning experience that seeks to hone students' skills regarding both legal analysis and legal advocacy concerning constitutional issues that arise throughout the entire course of a criminal case. *Trial Advocacy in Action* is ideal for use in upper-level criminal procedure classes, law school mock trial competitions, and continuing legal education (CLE) seminars for new criminal practitioners.
